

Risk	Risk Statement	Response strategy	Objectives	Likelihood	Impact	Risk Level
Online Login Security	Login to online software services like GitHub, Jira, MySQL, gcp, etc. Could be hacked and have data altered/removed causing in loss in project work.	Use stronger passwords and usernames than just “admin” or “root”, and keep them regularly updated.	Reduce the likelihood of hacking and data leaks.	Medium	High	Medium-to-High
Internet Connection	Internet Connection could drop resulting in delay in work or quality of presentation reduced	Using a LAN connection rather than Wireless Wi-Fi for a more stable and faster connection.	Reduce latency problems and stability of connection to online applications	Very Low	Low	Very Low –to- Low
Computer Crashing	Computer could up and crash causing unsaved data and work to be lost.	Using QA ltd provided Laptop rather than old personal computer.	Use QA provided Laptop for all QA training related work	Low	High	Medium
Project Incompletion due to lack of knowledge	Project Completion may not be met due in the allocated time due to inadequate knowledge on a problem or other skill required for the project.	Using QA community, contacting QA trainers for help, using external online sites for assistance and completing exercises and challenges.	Keeping content learned up to date to what the training requires and what the project requires	Low	Medium	Low-to-Medium

(Covid 19) Lockdown Issues	Theres a chance a family member or myself could be put under high risk or self-isolation (this could be due to positive test or close contact trace) and could affect project completion.	Following UK lockdown rules and informing QA if a situation relating to Covid arises.	Keeping QA informed if a situation occurs.	Low (in my area)	High	Medium
Software Required not setup correctly	Vital software such as (Eclipse, Java, Maven, MySQL etc.) not setup correctly may cause problems during the project and cause delay.	Reviewing training recordings and making sure with trainer all software is setup correctly.	Keep all software up to date requirements for the project and correctly installed.	Low	Medium	Low-to-Medium
Workday Project Burnout	Overworking without lunch break or working after 5:30pm GMT or pushing worktime when feeling tired would cause unwanted mental stress diminishing project quality.	Keeping motivated, healthy and taking breaks as required	Work and take breaks in the recommended required time.	Low	Low	Low
